## Simple. Easy. Fast.

With MedFlight911, getting your transport scheduled couldn't be easier.

### 1. Call us with the trip requirements

Where is the patient going?

When do they need to go?

What will the patient need during transport? (vent, invasive monitoring, medication)

### 2. Provide us with a few time-saving patient items:

Facesheet

History & Physical (H&P)

Discharge orders or summary

List of medications

Clinical notes from the last 3-5 days

### 3. We take care of the rest.

We locate the closest most appropriate resource.

We work directly with the insurance company to maximize the potential for reimbursement.

We coordinate with the patient's receiving facility, medical staff, you and any other agencies.

We update the receiving facility and you all along the transport process.

We follow up with you and the family once the transport is complete.
